REQUEST FOR PROPOSAL

Required instrument/services, general and special requirements (description prepared by QA/QC Center)

Participation in workplace noise measurements (Proficiency Testing, hereinafter, PT) programs launched by PT organizers compliant with ISO/IEC 17043 requirements (duly accredited).

A PT program organizer must:

- be duly accredited, certified for conformity to EN ISO/IEC 17043 requirements;
- operate as an independent, external and impartial assessment body;
- ensure the confidentiality of customer data, including test results, z-scores or other evaluation criteria, test methods and other information related to the participant provided under an identification code;
- evaluate the results and send a comprehensive PT program report to the participants via post or email. The report must include encrypted data on all laboratory tests, statistical test data analysis, z-scores or other evaluation results, and diagrams with test results.
- present a qualification verification/assessment certificate as proof of the laboratory's participation (optional);
- provide a software or electronic tool for the customer to register and present test data to the PT organizer, and to download instructions, recommendations, or any other information related to organizing PT programs.
- arrange a place for measurements and perform them in the same place and under the same conditions.

QA/QC Center plans to take part in the following PT/ILC programs in 2026:

- **Workplace noise measurements according to EN ISO 9612:2025.**
